

**Pozitia Grupului Ad- hoc de experti romano-ungari
privind raportul de analiza a Grupului Independent de Experti Internationali
(GIEI) referitor la Raportul la Studiul de Evaluare a Impactului asupra Mediului
(EIA) pentru proiectul Rosia Montana.**

In baza intelegerii dintre ministrii mediului din Romania si Republica Ungara, Grupul Ad-hoc de experti al Comisiei Mixte romano-ungare pentru protectia mediului a trecut in revista raportul Grupului Independent de Experti Internationali referitor la Raportul la studiul de evaluare a impactului asupra mediului pentru proiectul Rosia Montana.

Mandatul GIEI a fost analizarea capitolelor din Raportul la EIA legate de procesarea si transportul cianurii, constructia si managementul iazului de decantare, managementul apei, managementul de mediu, audit si transparenta, inchiderea minei.

Grupul Ad-hoc de experti isi exprima in cele ce urmeaza pozitia pe care o face publica impreuna cu Raportul GIEI:

Grupul Ad-hoc de experti:

- declara ca Raportul GIEI este un document de lucru care nu constituie punctul de vedere al celor doua ministere
- atrage atentia asupra acelor parti ale Raportului GIEI care pun in evidenta lipsurile si neclaritatile din Raportul la EIA
- constata, in baza Raportului GIEI, ca o parte din lipsurile si neclaritatile constatate au ramas inca deschise si necesita analize in continuare.
- constata ca in baza Raportului GIEI nu pot fi trase concluzii generale cu privire la intregul Raport EIA deoarece Raportul GIEI, in conformitate cu mandatul membrilor GIEI, analizeaza si exprima opinii numai asupra anumitor parti din Raportul EIA

Statement of the Hungarian – Romanian Ad hoc expert group on the “Evaluation Report: Environmental Impact Assessment Study for the Rosia Montana Project” prepared by Independent Group of International Experts (IGIE)

According to the agreement of the Hungarian and Romanian ministers for environment and water the Ad hoc expert group of the Hungarian – Romanian Joint Commission on Environment Protection reviewed the Evaluation Report, prepared by IGIE mandated by the Ad hoc expert group.

The task of the IGIE was the analysis of the chapters of the EIA documentation related to cyanide process and issues, transportation issues, TMF construction and management, water cycle management, environmental management, audits and transparency, as well as closure issues and concerns.

The Ad hoc expert group provides hereby the following statement and makes it together with the evaluation report of the IGIE available.

The Ad hoc expert group

- states that this evaluation report is a working document and does not form the official opinions of the Hungarian and Romanian ministries,
- draws the attention to the observations of the report, which point out deficiencies and unclarified issues of the EIA document ,
- on the basis of the report states that some points of query and concerns still remain open and desire further analysis,
- states that as the report – according to the mandate of the experts - analyses only certain chapters of the EIA documentation and gives opinion only on part of them, general conclusions regarding the whole EIA documentation cannot be drawn on the basis of the evaluation report of the IGIE.
