

New help for SMEs in the circular economy

LIFE is investing in the circular economy and in close-to-market projects that contribute to green growth and jobs

Are you a company that offers sustainable products or services that is looking to expand? An organisation that supports small and medium-sized enterprises (SMEs)? A regional authority?

If so, why not get involved in a new project from the European Commission that aims to kick start the circular economy among Europe's SMEs?

The project is open to the following:

- **SME support organisations** that would like to receive training on the circular economy
- **Circular solution providers** (companies which offer sustainable products and/or services) that would like to expand
- **Regional authorities** that would like to receive policy advice on how to support SMEs in adopting circular solutions

Expressions of interest must be submitted by Monday 18 September 2017 by filling in the digital application located

at: <http://ec.europa.eu/environment/funding/circular-economy-smes/>
